

Subcontractor Policy Statement

IDSL utilises subcontractors and subcontract labour as required on contracts.

All subcontractors must first complete the IDSL Safety, Health and Environmental Management Preferred Contractor – Initial Questionnaire (PQQ). The PQQ form requires the subcontractors to confirm compliance with a number of IDSL's required policies, including, but not limited to;

- Right to Work checks
- Site risk management
- Company risk management
- Health and safety policies including PPE
- Skill card requirements
- Required level of insurance cover, including providing copy certificates
- Details of business structure and tax compliance information

IDSL's PQQ form is signed and approved by;

1. The Contract Director
2. The Accounts Team
3. The Quality Control Team

Once the subcontractor is approved, the accounts team monitor and review any changes to the subcontractors' business including annual insurance renewals.

The contract Director is responsible for ensuring that any subcontractor complies with IDSL policies onsite, including, but not limited to;

- Site Induction
- Toolbox Talks
- Site Health & safety procedures
- Site Fire Procedures
- Site First Aid arrangements
- Other Site and IDSL rules and procedures

Dean Barnes
Managing Director

A handwritten signature in black ink, appearing to read 'D. Barnes', is placed below the printed name and title.
